PRESS RELEASE

Erbud entered into the Agreement for Construction Safety

On 5 February 2015, Erbud entered into the Agreement for Construction Safety and thereby joined the initiative to promote the highest standards of occupational health and safety in construction projects. The motto of the campaign is "Zero accidents".

A high level of work safety is a condition for the sustainable business success. Therefore, education of employees on health and safety at site and elimination of risks associated is an important part of a strategic approach to the managing a company in the construction industry. As regards the safety, there can be no compromise, so we join with conviction the initiative of construction companies which is aimed to reduce accidents on sites – said Mr. Józef Zubelewicz, President of Erbud SA.

The initiative is oriented towards improving safety on Polish construction sites by raising the level of work culture and increasing the awareness of H&S rules among the workers and the society. The primary purpose of the Agreement is to eliminate fatal accidents on sites in Poland.

The Agreement involves ten largest construction companies in our country.

More about the initiative **Agreement for Construction Safety** can be found under:
